PROFESSIONAL EXPERIENCE

Self Employed

May 2025 – Present

Independent Technical Consultant

Remote

- **Gathered business and systems requirements independently** for enterprise applications conducting stakeholder analysis and elicitation sessions with business and IT stakeholders; created use cases, business process models, acceptance criteria, and effort estimations
- Performed gap analysis and documented business rules and data requirements for healthcare, research, and portfolio systems with comprehensive requirements documentation
- Led requirements activities using Agile methodology managing requirements from elicitation through testing and implementation across multiple concurrent projects

Peanut Square LLP

July 2022 – July 2023

Laravel Developer

Ahmedabad, India

- **Gathered business and systems requirements independently** through stakeholder analysis and workshops with 3rd party vendors; translated business objectives into user stories with acceptance criteria and effort estimation using **Jira** and **Confluence**
- Led requirements planning and prioritization using Agile methodology with sprint planning and backlog refinement; managed requirements from elicitation through testing and implementation for vendor integrations (PayPal, Stripe) achieving 100% transaction reliability
- Performed scope modeling, business process modeling, and gap analysis for payment gateway integrations; optimized database performance 40% through requirements analysis migrating 1M+ records

Dev Information Technology Ltd

July 2020 – July 2022

Software Developer

Ahmedabad, India

- **Gathered business and systems requirements independently** for microservices architecture processing 200K+ daily records; created use cases, data requirements, and business rules analysis documentation with strong business analysis and systems analysis skills
- Led 1:1 elicitation sessions with BU stakeholders and IT stakeholders applying various requirements analysis techniques; created user stories, story decomposition, and acceptance criteria definition using **Mural** and **LucidChart**
- Coordinated delivery using Agile, Waterfall and Iterative methodologies with requirements planning, prioritization, and stakeholder analysis; achieved 99.9% system availability through comprehensive gap analysis and non-functional requirements definition

ADDITIONAL EXPERIENCE

ONroute

Dec 2023 – Present

Customer Service Representative (Part-time)

Woodstock, ON
