NAMRATA MODHA

Full-Stack Developer | Node.js, TypeScript, React, Python, PHP, Java
London, ON (open to relocation) | 548-881-3098 | namratamodha3@gmail.com
linkedin.com/in/namrata-modha | github.com/Namrata-Modha | nam-portfolio-flax.vercel.app

SKILLS

Backend: Node.js, Express, TypeScript, Python, FastAPI, PHP, Laravel, Java, REST APIs, WebSockets
Frontend: React, TypeScript, JavaScript, Next.js, HTML5, CSS3, Tailwind CSS
Data: MySQL, PostgreSQL, Redis, MongoDB, SQL, transactions and data modeling
Integrations and Security: Stripe, PayPal, bank-redirect payments, third-party APIs, OWASP practices (rate limiting, input validation, security headers, CORS)
Delivery: unit and integration testing, CI/CD, GitHub Actions, Docker, Git, AWS (Cloud Practitioner, 2022), AI-assisted development with Claude Code

PROFESSIONAL EXPERIENCE

Peanut Square LLP
Jul 2022 – Aug 2023
Laravel Developer | Ahmedabad, India

- Integrated Stripe and PayPal hosted checkout through their APIs, keeping card data off company servers, and built a separate bank-redirect card payment flow for customers in India
- Delivered scheduling, booking and payment features with a React frontend across multiple concurrent client projects, working in Agile sprints with GitLab, Jira and Confluence
- Migrated 1M+ records from MySQL to MongoDB, redesigning the relational schema into document collections

Dev Information Technology Ltd
Jul 2020 – Jul 2022
Full Stack Developer (Cloud) | promoted twice from Trainee | Ahmedabad, India

- Rebuilt core modules of a live legacy PHP 5 hotel booking system, including authentication, room-availability booking and role-based access control
- Traced an intermittent production failure, where identical bookings failed unpredictably, to how incoming data was parsed and stored, and fixed it in both the parsing logic and the queries
- Resolved 20+ bugs and support tickets a day on the live system, tracing each issue to its root cause
- Diagnosed slow production pages by timing their MySQL queries, and cached frequently read data in Redis
- Developed Node.js microservices, and built Python automation that processed XML data on cron schedules

PROJECTS

MediLight | Node.js, Express, PostgreSQL, React, WebSocket | Live demo | GitHub

- Pharmacy dispensing system with an Express API and React dashboard; moved order processing into PostgreSQL transactions after finding a simulated LED shelf could light up before an order was saved
- Hardened the API after auditing it myself: rate limiting, schema-based input validation, security headers, CORS locked to known origins, sanitized errors, and a secret key on destructive admin routes

Tulsi Art | Next.js, TypeScript, Supabase (Postgres, Auth, Storage), Tailwind CSS | Live site | GitHub

- Live storefront for a family-run handmade-goods business: a public catalogue where customers order over WhatsApp, and a login-protected admin panel where the owner manages stock themselves
- Built product management with Server Actions: photos compressed in the browser before upload, a mark-sold flow that frees storage and logs the sale, and a sales page with monthly and inventory-cost stats

Rubin Scout | Python, FastAPI, React, PostgreSQL, TimescaleDB, Docker, GitHub Actions | Live demo | GitHub

- Live astronomy alert platform that integrates six external APIs, with retries and backoff on high-volume feeds
- 280+ tests, linting and migration checks run on every pull request; main deploys only after CI passes

MyHealthQR | Laravel, PHP, PostgreSQL | technical lead, team of six | Fanshawe capstone, first place | GitHub

EDUCATION

Postgraduate Certificate, Business and Information Systems Architecture
Fanshawe College | London, ON | Sep 2023 – Apr 2025 | GPA 3.97; Dean's Honour Roll, Semesters 2–4

Bachelor of Engineering, Computer Engineering
Silver Oak College / Gujarat Technological University | Sep 2017 – Apr 2020 | GPA 8.35/10

ADDITIONAL EXPERIENCE

ONroute | Customer Service Representative (part-time) | Woodstock, ON | Dec 2023 – Present
